A trip through memory lane minutes over the past WYLD year indicates the committee met fairly regularly but not each month. An outline recap follows.

1. Per committee suggestion, the WYLD support team got around to all the regions to meet with people and lend support in various ways.
2. We continued review of checklists with just three remaining: Serials, WYLD CAT (e-Library), and Linking & Cataloging, which is kind of on hold because we expect BLUE changes sometime before the end of the calendar year.
3. We learned about new WYLD developments, including WorldShare and Enterprise.
4. We continued to update the glossary and insert some illustrations. We're almost finished with the first go-through and will offer a link to the revised glossary to WYLD members when it is completed. We accept suggestions for inclusions and corrections.

Thanks to all the committee members, who are indeed awesome and put up with my GoToMeeting faux pas, like log-in changes....
