Library 2.018: Design Thinking: How Librarians Are Incorporating It Into Their Practice (Library 2.0/SJSU)

Design thinking is a process designers use to thoughtfully identify problems and then, using a team-based approach, develop prototypes useful for implementing an elegant solution. In response to the growing interest in design thinking, this event will provide attendees with both insights into the process and examples of how librarians are integrating it into their practice. If you've been hearing about design thinking and want to learn more about how you can develop and lead a design challenge at your library, this is your opportunity.

Making Difficult Conversations Easy (Effectiveness Institute)

Do you shy away from conflict? In organizations across the world conflict is avoided. Expectations go unmet, values are violated, and overall underperformance exists because people do not know how to effectively resolve issues without resorting to the use of power. This one hour session introduces you to concepts that enable you to begin to “integrate conflict” - to walk into it and effectively handle it - rather than avoid it.

Making Leadership Happen, at Scale: Combining Collaborative Approaches to Leadership with Emerging Digital Learning Tools (Training Magazine Network)

Today's interconnected, fast-changing and unstable world demands a new kind of leadership. Instead of putting the entire weight of leadership on individual managers and their capabilities, we need to examine how the whole system is involved in making leadership happen. Along with a system approach to making leadership happen, we need approaches to leadership development that also focus on the collective, not the individual, and that happen at scale.
