Wednesday, Sep 1 (12-1)
Family Homelessness and Libraries (Niche Academy)

Widespread economic instability and high rates of eviction over the past year have again increased the numbers of children and families in homeless situations, while also highlighting ongoing social and economic inequities. Within this context, libraries can serve as a key support and community resource for children and parents whose housing is unstable. This webinar will provide practical tips for connecting with local schools and community organizations to understand the nature of family homelessness in your community and to reach families where they are.

Wednesday, Sep 8 (9-10 am)

**NCompass Live: Manga and Graphic Novels in Your Library (Nebraska Library Commission)**

Graphic novels and manga are everywhere: TV series, movies, and now coming to a library near you! Starting a collection or updating your holdings can be a challenge in this medium. Which superhero do I follow? Should I start purchasing this manga or wait until it’s complete? Graphic novels and manga are a great addition to any library, but it can feel intimidating to purchase items for this collection without having a knowledge base to work with. This presentation will cover what exactly makes up a comic or manga, the different types and genres, how to get started with your collection, and the logistics of getting into this particular art form.

Wednesday, Sep 8 (9-10 am)

**Incorporating Health Literacy in Community Engagement (NNLM Region 3)**

Written and digital materials are a fundamental component of engaging the community in health education programming. Unfortunately, many adults lack the skills they need to understand and use these materials, many of which do not incorporate common health literacy and plain language best practices. The UAMS Center for Health Literacy has a suite of written and digital materials to engage patients and community members to better care for themselves and improve health literacy skills. These resources were designed to empower individuals to communicate more effectively with providers and to engage in better self-care. This presentation will highlight our suite of community engagement resources and provide an overview of our development process including field testing and plain language best practices.

Wednesday, Sep 8 (11-12 pm)
Education Statistics 101 (Federal Depository Library Program)

This webinar will provide an introduction to the basic Federal Government tools for statistics on schools and education. We will focus on the Department of Education. Gov Docs 101 is a series of introductory subject webinars on frequently-requested Government information topics.

Thursday, Sep 9 (12-1 pm)
Engaging the Volunteer of the Future (VolunteerMatch)

The age of one-size fits all volunteer engagement is coming to an end. This webinar will start with a review of some of the things that we know about what volunteers are looking for in an opportunity. It will then help you use this information to start designing volunteer opportunities and determining who is the “right” volunteer for your program. You’ll also learn how “word of mouth” plays such a large role in attracting volunteers to your organization and how social media makes this even more important.

Tuesday, Sep 14 (11-12:30 pm)  
**Reducing Environmental Impacts of Collections Care and Management** *(Connecting to Collections Care)*

People who protect and care for collections are often concerned about the negative impacts of their work on the environment and climate. Fortunately there are resources and practices that augment what you likely already do to limit waste and save money. And there is social science research to guide us in understanding how to adapt behaviors while remaining positive. We’ll explore a variety of approaches that you can take as an individual to ‘green’ your work, AND we’ll consider steps to take to encourage your institution and your peers to join you in making these shifts.

**NCompass Live: Library School Now - Library Workers Talk about Their Library Science Coursework (Nebraska Library Commission)**

Nebraska Library Commission employees who are currently taking college-level coursework in Library Science talk about their decision to take classes, share details about their program experience, and discuss what it's like to be in Library School right now. What are they glad they did to prepare? What might they do differently? What are they looking forward to, as they progress ahead? Catch them as the fall semester takes off! This discussion will be useful for people thinking about enrolling in a Library Science program, switching programs, going back to finish programs, or anyone who knows people who might find themselves in those positions.

Wednesday, Sep 15 (11-12 pm)
**Power of Community in Strategic Planning (Bloomerang)**

Too often strategic planning happens in a vacuum, visions casted, momentum built, plans written -- yet the people directly impacted by the plan (clients, donors, staff, volunteers, community) are left out. This process has led to plans that have failed to meet its full potential. Community engagement, though at times unwieldy and time-consuming, is critical to truly propel all variables towards a common goal. You’ll see that when done well, a snowball effect happens, where the impossible becomes possible.

**Soft Skills: The Tools Every Librarian Should Have (Niche Academy)**

Soft skills often speak to personality or character or the way a person works – things that are not necessarily definable or even measurable. In reviewing job postings, the soft skills librarians should have cover the ability to be a team player, collaborate, adapt to change. Librarians need to have interpersonal and communication skills, be organized and courteous. But, what does it mean to be collegial, creative, or detail-oriented? Most importantly, are they skills that can be taught? The answer is unequivocally yes, but the key is being aware of them first so you can learn how to master them.

**Addressing STEM Stereotypes and Biases: Facilitating Challenging Conversations with Youth (National Girls Collaborative Project)**

Stereotypes about who does STEM continue to be pervasive in current society. For girls, particularly girls of color, the cultural stereotypes of STEM disciplines as male dominated and white prevent them from seeing their current or possible future selves within these communities (Kang et al., 2019). Join NGCP as we dig into this topic and hear from various perspectives on their experiences engaging in challenging conversations. Speakers will also share strategies and resources for addressing and discussing STEM stereotypes and bias with youth.

Planned Giving Within Reach (Candid Learning)

When the topic of planned giving (arranging now for a future contribution, usually upon a donor's death) comes up, many nonprofit leaders and development professionals start to squirm. It can be overwhelming to know where to start, the technicalities of giving vehicles can be confusing, and the idea of talking to people about something that involves their death can be uncomfortable. Accordingly, many community-based nonprofits shy away from planned giving. Yet it doesn’t have to be this way, and you shouldn’t miss the opportunity planned giving offers. Planned giving can be done simply and joyfully. Join Thread Strategies Principals Taryn Deaton and Tracy Shaw for this webinar to learn how to get started and how to incorporate planned giving into your annual development plan.

Pushing Past Bias and Challenging Classroom Behaviors: Changing Children's Behavior Starts With Changing Ourselves (Early Childhood Investigations)

When children exhibit behaviors that are not compliant, early educators often label them “challenging.” But are they really? Teachers and administrators often jump to conclusions about the child or their family and community. However, behavior is complex so there is seldom one reason children don’t or cannot comply with our expectations. Research shows order to gain a meaningful understanding of children’s behavior there must be a meaningful understanding of adult bias and the context in which these behaviors occurs. This webinar will help you look beyond the child to the implicit bias, contextual elements, interactions, and classroom variables that might contribute to labeling behavior as challenging.

**How to Write More Effective Email and Web Content (Infopeople)**

On the web people don’t read, they scan, skim and select. In fact, usability studies show that less is more — people don’t find information that is right in front of them when it’s buried in long paragraphs. When it comes to email, communicating effectively is especially important, and the same guidelines for writing web content apply. With email, you also need to consider subject lines, who else to copy, and what outcome you are hoping for with each email you send. In this webinar, we’ll offer specific guidelines that will help you communicate more effectively in an age where people read most of your content on a screen.
