SPEAKERS

Andrew Ysasi has over 20 years of professional experience and 10 years of executive experience. He has a passion for helping people and organizations succeed and thrive. Andrew achieves success through team development, transparency, hard work, and achieving goals.

Julie Colgan is a certified records manager and certified information governance professional with 20 years of experience in the records and information governance field. She has worked as a practitioner, as an advisor, and as a software and service provider executive.

TOPICS

RIM/IG IN TIMES OF DISRUPTION AND ACCELERATION *JULIE COLGAN*

Significant changes in the world have historically occurred during times of disruption, often driven by technological advances. Initially, these major disruptions occurred every generation, then they started occurring each decade, then every year and now disruptions are accelerating faster than ever before. Disruptions bring both uncertainty and opportunity, and the increasing speed of acceleration requires both unprecedented abilities, for both organizations and individuals, to be successful in these uncertain times.

The pandemic has been a major disruption, and because of it, the world is changing very fast. Digital transformation is no longer an option, and this has presented RIM and IG professionals with a unique opportunity to help their organizations meet the challenges and uncertainty of the times.

In this session, we will get insights on how to be successful during times of accelerated disruption from 1 of the industries most innovative thinkers.

CYBER SECURITY AND IG *ANDREW YSASI*

Cybersecurity professionals are continually defending our organizations from cyber-attacks, and IG professionals can be a reliable ally to our cybersecurity friends. Learn some of the challenges they face, joint issues, and specific questions to ask cyber professionals.
