

**Dear Kimberly Brubaker Bradley,**

Dec 18, By Eden Adams

Your book, *The War that Saved My Life* Is amazing. While reading this book I got to see a different view of World War II. I've only read WW2 books that were either about people that were Jews or those who were German. Your book gives a different perspective. One that I've never thought of. It also helped bring my mom and me together.

This book helped me understand what it was like for other countries during WW2. In your book, you don't see the perspective of a Jew, you see the perspective of an English girl. She has a horrible life, too. Probably not as harsh as a Jew's life in this time, but still hard. You never actually think about what other countries might have been going through during that time. You think of the Jews and the Germans. This book gives you an input on what those people might have been through at that time. You get a sense of how horrible it was. Germans bombed England and many other places, too. After reading this book, I found I was more sympathetic to those other countries who fought. Thank you for giving me an opportunity to see from a different perspective.

You also helped my mom and I grow closer together. We hugged, we cried and we-not very often- laughed, crying predominating. When we learned about how horribly Mam treated Ada, we cried. When Mam came to pick Ada and Jamie, we both hugged each other and we cried sad tears. This story made me feel my mom's love for me more than I ever have before. After this long, sad journey through the amazing book, my mom and I decided we would spend even more time together. She bought me a book called *Just Mom and Me*, so that we could think of activities to do. Now, almost every month, we try to do something out of that book. My mom and I are now very close, and I owe it all to you. My mom and I are so close. Thank you for helping me to be closer with my mother.

You helped me so much in very different ways. Your book made my mom and I closer and you helped me to see and understand another perspective on WW2. Every time a friend or family member-besides my mom- asks me for a book recommendation, I always say, "The War That Saved My Life, By Kimberly Brubaker Bradley." Your book is #1 on my list.

**Sincerely,**

**Eden Adams**
